Profile

Full Stack Developer, with a software engineering foundation in C from 42 Barcelona and six years in 3D behind me. I build REST APIs in Java (Spring Boot) and Node.js (Express) over relational databases, connect them to Vue 3 SPAs, and cover them with automated tests. I bring AI tools into my flow without delegating the technical judgement: I direct the architecture, the specification (SDD) and the tests (TDD). From 3D I bring direct client work, iteration on feedback and delivery to deadline. Looking for a Full Stack, Frontend or Backend role in Murcia, Barcelona or remote. Also available for an internship through a school agreement.

Skills

Backend: Java 17, Spring Boot 3, Spring Data JPA, Hibernate, Spring Security, Node.js, Express, REST APIs

Data: MySQL, PostgreSQL, Prisma, Supabase, SQL, relational modelling

Testing & quality: JUnit 5, Mockito, MockMvc, Jest, Supertest, Vitest, Playwright, Swagger/OpenAPI, Postman

Frontend: Vue 3 (Composition API), Vue Router, JavaScript, TypeScript, Vite, HTML5, CSS3, GSAP

Design: Figma, Three.js, Blender

Systems: C, Linux, Bash

Tools: Git, GitHub Actions, Maven, Docker, Vercel, Railway, IntelliJ IDEA, VS Code, Vim

Practices: Agile (Scrum), SOLID, test-driven development (TDD), spec-driven development (SDD), CI/CD, Gitflow, AI-assisted development (Claude Code, OpenCode, Ollama)

Experience

Full Stack Developer (Freelance) | CreandoMientras

2026

Remote

- Built the public site and the self-service admin panel of a handmade macramé business (creandomientras.com)
- Developed the Vue 3 SPA with Vue Router and its own design system, with a Git-based headless CMS (Sveltia) that gives the client autonomy to publish without touching code
- Automated deployment on Vercel and image optimisation in CI, reaching a PageSpeed of 99 on desktop

3D Artist / Modeller (Freelance)

2018 – 2024

Spain

- Created characters, props and environments for games as a 3D generalist in VFX, with modelling and UV mapping
- Designed miniatures and environments for 3D printing, 3D cards for a board game and exercise animations for a fitness app
- Managed direct client work: requirements gathering, iteration on feedback and delivery to deadline

DIM Tech 3D | 3D Generalist

2019 – 2020

Murcia, Spain

- Digitised products for the e-commerce of El Corte Inglés, GOBIK, Mayoral, Bugaboo, Tesoro Yachts and Mobel
- Modelled, sculpted, textured, baked, scanned and simulated cloth, coordinating with each company's departments and with international clients

Projects

sideForge | REST API in Java 17 and Spring Boot 3

2025

Java 17, Spring Boot 3, Spring Data JPA, Hibernate, Spring Security, MySQL, Swagger/OpenAPI, JUnit 5, Mockito, Maven

github.com/krub-dev/sideForge

- Developed a 42-endpoint API over 6 related entities, with layered architecture (controller / service / repository), 18 DTOs, pagination, search and centralised error handling through custom exceptions
- Wrote 112 tests with JUnit 5 (controllers with MockMvc and services with Mockito), with 81% line coverage on the project, 100% on the controller layer and 98% on the service layer
- Implemented role-based authorisation with Spring Security and documented the API with Swagger/OpenAPI and Postman collections

Showroom | REST API and content management SPA

2025

Vue 3, Vue Router, Express, PostgreSQL, Prisma, Jest, Supertest

github.com/krub-dev/SHOWROOM-FULLSTACK-M3

- Implemented an Express API over PostgreSQL with Prisma: full CRUD, search by title and technologies, featured items, server-side pagination and indexes on the filter columns
- Wrote 17 integration tests with Jest and Supertest against a real database, covering the create, edit and delete cycle and the authentication and validation cases, with writes protected by an admin-key middleware
- Developed the Vue 3 (Composition API) frontend connected to the API

IronBooking | Booking backend in a team

2025

Java 17, Spring Boot, Spring Data JPA, PostgreSQL, JUnit 5, Maven

github.com/krub-dev/IronBooking

- Built a Spring Boot REST API for managing spaces, bookings and reviews: 30 endpoints and 5 related entities, with 20 tests
- Collaborated in a five-person team with Gitflow: feature branches and peer-reviewed pull requests before merging

krub.dev | Portfolio

2026

Vue 3, Vite, vue-i18n, Vitest, Playwright, Vercel

krub.dev | github.com/krub-dev/portfolio-krub

- Developed the Vue 3 and Vite SPA with its own design system on a single token file: two languages (vue-i18n), two themes, five accent palettes and a serverless contact form
- Implemented unit tests with Vitest and end-to-end tests with Playwright in real browsers, taking care of SEO, accessibility and performance, and deployed on Vercel

42 | Software engineering in C

2024 – 2026

C, Makefile, threads and mutexes, signals, MLX42

github.com/krub-dev (42)

- Built minishell, a shell of my own in C with tokenizer, parser, command execution, pipes and redirections; 46 files and about 3,100 lines of my own across parsing, expansion, execution and builtins modules
- Solved push_swap, sorting integers with a limited set of operations over two stacks, with radix sort and bitwise operations, plus a checker of my own to validate the generated sequence
- Implemented philosophers and minitalk: concurrency with threads and mutexes with deadlock prevention, and inter-process communication over signals
- Developed libft, ft_printf and get_next_line, a C utility library built from scratch, plus born2beroot (Linux system administration) and so_long (2D game with MLX42)

Education

Higher Vocational Diploma in Web Application Development (DAW) | IES Francisco de Goya 2026 – present

Murcia, Spain (distance learning)

- Official Higher Technician qualification (EQF level 5). First year under way, compatible with employment

42 Network - Barcelona (Fundación Telefónica) | Programming and Software Development 2024 – 2026

Barcelona, Spain

- Intensive project-based training, covering the full software development cycle and quality and maintainability best practices
- C and Shell scripting (Bash): algorithms, data structures, memory management and computational logic; Git, Unix/Linux environments and task automation
- Individual and team work with peer code review

Ironhack | Full Stack Web Development (IFCD0210) 2025

Barcelona, Spain

- End-to-end full stack web development, with best practices and design patterns
- Frontend with HTML5, CSS3, JavaScript and Vue.js; collaboration with Gitflow, branches, pull requests and code review
- Backend with Java and Spring Boot (RESTful APIs, JWT, SOLID) and Node.js (MVC, controllers, CRUD); MySQL and PostgreSQL with Supabase integration
- Testing with JUnit and Mockito, APIs documented with Postman and Swagger, Docker and deployment on Vercel and Netlify
- Level 3 professional certificate (590 h), with 80 hours of company internship

La Salle BCN (Universidad Ramon Llull) | Java and Web Development 2025

Barcelona, Spain

- Java fundamentals aligned with Oracle certification
- Web Application Development with PHP and MySQL: OOP, database design and SQL

Certifications

AI Skills Fest | Microsoft 2026

AWS Fundamentals: Cloud, Serverless and Operations | Commit Academy 2026

Introduction to AI-assisted Development | BIGschool 2025

Languages

Spanish (native) | English B2
